

## Resources for Integrative Understanding

### **Selected Bibliography: Resources for Integrative Understanding about “EcoHealth and Climate Change: Connections for Health, Ecosystems and Society”**

The selected bibliography presented here was derived from the wisdom of the International Working Group and Reference Group that engaged in the preparation of the EcoHealth 2014 [Conference Statement](#). Selected through a “forced choice” distillation, these resources provide the basis for a dynamic bibliography to inform present and future researchers and practitioners who seek to benefit from and build upon the collective/emergent wisdom of the ecohealth community to date. This bibliography will be maintained at [ecohealth-live.net](http://ecohealth-live.net) after the conference.

Due to copyright laws we are unable to provide direct access to full publications other than those that are published as Open Access material.
